Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 10 of claim 1, is the 'element' listed the same as the element previously mentioned?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5,11-13,15,18,19 are rejected under 35 U.S.C. 102(b) as being anticipated by May. This patent shows a bucket having a jaw crusher with one of the jaws having an oscillating/transverse motion and adjusting means.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-10,16,17,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over May in view of Francis. May does not use 2 eccentrics nor an adjustable strut for improved crushing. Francis solves this problem by disclosing similar apparatus

including the use of 2 eccentrics and an adjustable strut. In order to improve crushing, it would have been obvious for one of ordinary skill in the art to modify May by providing 2 eccentrics and an adjustable strut, taught to be desirable by Francis.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over May as applied to claim 1 above, and further in view of the German '475 patent. May does not appear to show the specific groove alignment claimed which may result in inefficient crushing. The German reference shows similar apparatus including the use of aligned grooves and recesses. In order to ensure efficient crushing, it would have been obvious for one of ordinary skill in the art to modify May by placing the grooves and recesses in alignment, taught to be desirable by the German patent.
